

**PREHEARING QUESTIONNAIRE**

**City of Goddard Responses 08.06.15**

(Goddard Ordinance No. 707, as corrected by No. 729)

- 1) The service plan prepared by the City at the time of annexation described the following planned extension of services: - *Please see the attached chart.*

Upon and after annexation

Street Maintenance (including sweeping and pothole repair)  
Ditch Cleaning  
Culvert Cleaning  
Police Protection  
Parks  
City Building Codes Enforcement  
City Health Codes Enforcement  
City Housing Codes Enforcement  
City Zoning Codes Enforcement

As warranted or necessary

Street Lights  
Water Mains  
Fire Hydrants

Upon petition or request of landowner(s)

Local Street Improvements  
Water Laterals

- 2) The service plan also indicated the following services were to be provided:

Upon the completion of the 199<sup>th</sup> Street West project the City of Goddard will assume the maintenance and management of 199<sup>th</sup> Street West to Maple Street. This will include the systematic repair of the road surface as well as incorporating the road into the City's snow removal and ice management policies. . . . Additionally, 199<sup>th</sup> Street West will be monitored and become part of the city's crack-filling maintenance plan.

*199<sup>th</sup> Street West is maintained by the City, including snow removal, ice management, and crack-filling as needed.*

The City is working in conjunction with Sedgwick County on an upgraded road which after completion the City will provide maintenance for.

Maple Street – A recent Sedgwick County traffic study indicated the need based on volume, access points and other factors to

reduce the current speed limit from 55 mph to 45 mph. The City and County will continue to monitor conditions on this road and make appropriate changes when necessitated.

*The speed limit on Maple in the city limits of Goddard has been reduced to 45 MPH.*

Maple/199<sup>th</sup> Street West - . . . The city will monitor this intersection just as it does others to determine the appropriateness of additional traffic calming devices.

*A two way stop is maintained at this intersection; the City continues to monitor this and other intersections in town for appropriateness of traffic calming.*

Maple/183<sup>rd</sup> Street West - A two-way stop exists for 183<sup>rd</sup> Street West at its intersection with Maple Street. At the time of this report the stop sign is adequate in calming traffic in the area but the city will monitor the intersection through city and county traffic studies to determine necessary and appropriate traffic calming methods.

*A two way stop is maintained at this intersection- the South Side by City of Goddard, the North by Attica Township. The City continues to monitor this and other intersections in town for appropriateness of traffic calming.*

Future Sanitary Sewer Use – At that time when the property owners current sewer system should fail, the property owner will be required to tie into the City’s sewer system that is readily available. All costs associated with the tapping of the sewer will be waived for new users. All costs associated with the installation of the property owner’s sewer line or system requirements will be the responsibility of the property owner. The city charges a nominal monthly fee for sewer that the property owner will be responsible for.

*The City provides sewer service to residents at the following addresses. The costs associated with tapping of the sewer lines were waived.*

- 1231 S. 199<sup>th</sup> St. W
- 1205 S. 199<sup>th</sup> St. W
- 1327 S. 199<sup>th</sup> St. W
- 1335 S. 199<sup>th</sup> St. W
- 1401 S. 199<sup>th</sup> St. W (also on City water)

The City of Goddard allows residents to contract for their own solid waste disposals. However, the City is considering creating a Solid Waste Utility in an effort to reduce fees collected from residents. If the City were to create this fund residents in this area would be able to take full advantage of this service.

*At this this time citizens of Goddard contract for their own solid waste disposal. Should the City create this service in the future it will be open to all residents.*

- 3) Please provide any comments regarding the above services, included but not limited to:

Has the city provided these services?

Has any landowner petitioned or requested services that were to be provided upon petition or request?

For the services to be provided as warranted or necessary; what services were determined to be warranted or necessary, and were those service provided?

*Please see the above answers and attached chart.*
